

Video Release Mixer · Title-Mixing Card

Every word proven. None invented.

FIVE SETUP-LINES

- 1 Bring your own key — 7 providers, 4 tiers each; the key stays encrypted on your machine.
- 2 Set your channel-criteria (subscriber-ceiling, view-floor, channel-age, monetization, viral-track-record).
- 3 Enter your topic-anchor — what the video is actually about.
- 4 Add five inspirations — titles from channels already performing in your niche.
- 5 Run No-Invent-Mode → 20 titles, every word traceable to a high-performing source-title.

SEVEN MIX-QUALITY CHECKS

- ☐ Strict-LEDs — which criteria each inspiration cleared (and which it didn't).
- ☐ Proof-Rating per output title — how much comes from high-performers.
- ☐ Per-word provenance (channel / video / view-count) for the words you keep.
- ☐ No invented words — every word appeared in a real performing title.
- ☐ Tier picked per session (Free=daily · Budget=bulk · Standard=precision · Premium=reach).
- ☐ Strictness set for the phase (loose for ideation, tight for shipping).
- ☐ The .vrm file exports/imports across machines — and shares with your team.

ONE THRESHOLD

Proof-Rating. Sort descending and ship only from the top band; below your Proof-Rating floor, re-mix before you publish.

Video Release Mixer · videoreleasemixer.com · 48 hours, no card ·

Free. No email-gate. No upsell.

Less inventing. More proving.
